Latest Update: Senators Looking for Solutions for Election Fraud Including Hand Counting with No Machines

In legislative hearings March 2nd at the state capital there was discussion of going back to paper ballots and hand counting.

In Government, Military and Veterans Affairs Committee Hearings Sentors. Brewer, Lowe, Halloran, Sanders, along with Senators Albrecht & Erdman discussed many issues about our election process. This group of Senators were asking many questions of Bob Evnen Sec. of State in the hearing and how elections could be conducted manually. This was following Dr. Frank and Col. Shawn Smith's descriptions of constant cyber-attacks on the Dept of Defense, military & supply chain systems. Our election systems are not secure. Nebraska Voter Accuracy Project's canvassing, raw data research, and other results indicated there is fraudulent activity in our state elections, especially with early, absentee, and mail-in ballots. No county is immune.

Col. Smith told legislators, everyone from the Dept of Defense knows these machines & their component parts manufactured overseas cannot be trusted.

Ask us to present to your group! Larry Ortega/presenter has managed aeronautics operations including space projects. Nebraska Voter Accuracy Project ANALY-SIS have come from mathematical break down of direct election data and gives us undeniable proof our elections are controlled by a outside influence!
